About Think Energy Media

Think Energy Media is Africa's foremost online media platform dedicated exclusively to sustainability and ESG (Environmental, Social, and Governance) issues. As a leading media organization in Africa for this specialized sector, we work hard to empower Africa to build capacity in sustainability and help avoid greenwashing in ESG-related reports.

We offer in-depth coverage of African and global sustainability issues, surpassing any other media outlet. Our planned expansion into every African capital in the coming years will bring us closer to global decision-makers. In 2025, Think Energy Media will produce the first African Sustainability Report (ASR), authored by experts across Africa. This report will measure progress towards achieving Sustainable Development Goals (SDGs) 4, 7, 13, and 14.

As the founding home of the African Association of Sustainability Practitioners (AASUP), we are the leading voice for sustainability in Africa.

The African Association of Sustainability Practitioners (AASuP) is the biggest community of sustainable passionate people in corporate practice across Africa promoted by ThinkEnergyMedia. This Non-governmental organisation cuts across every sector of corporate practice and seeks to achieve the ff

- Capacity building amongst members
- Promoting governance and regulatory environment for sustainability
- Promoting sustainable development in Africa
- Peer review and best practices amongst members
- Seek partnership with other members outside Africa
- Vote Annually for Top achievers and leaders in corporate Africa.

Membership is open voluntarily to Africans and African diaspora and Residents practitioners in Africa by individuals or Corporate organisations. An Annual subscription dues is paid to enjoy continuous membership and voting rights.

Welcome Address

By CEO

Ladies and gentlemen, esteemed guests, and fellow stakeholders,

I am honored to welcome you to the 5th Africa Energy and Sustainability Summit. Today, we gather to address a critical challenge: ensuring a smooth energy transition for a sustainable future.

As we all know, the energy landscape is changing rapidly. Climate change, technological innovation, and shifting market dynamics demand that we adapt and evolve. But I firmly believe that this transition presents an opportunity – an opportunity to create a more sustainable, equitable, and prosperous future for all Africans.

I would like to take a moment to express my deepest gratitude to our partners, who have been instrumental in making this summit a reality. Specifically, I would like to thank:

- Daily Graphic, our media partner, for their tireless efforts in promoting our cause and sharing our message with a wider audience.
- Deloitte, our event statistical support firm, for providing expert analysis and insights that have helped shape our program and inform our discussions.

Your support and expertise have been invaluable, and we are grateful for your commitment to our shared vision of a sustainable future.

I would also like to extend my sincerest appreciation to our board members, who have provided invaluable guidance and support throughout our journey. Your wisdom, expertise, and unwavering commitment have been instrumental in shaping our organization and driving our mission forward.

In particular, I would like to thank our Chairman, Dr. Ben Asante, for his tireless dedication and leadership over the past five years. Your vision, passion, and expertise have been the driving force behind our efforts to build the human capital required for a smooth energy transition.

The timing of this summit is significant. We gather on the eve of the launch of political parties' manifestos on Green Economy, a testament to the growing recognition of sustainability as a cornerstone of Africa's development.

Furthermore, our Think Energy SDG Awards and ESG Summit will recognize and celebrate trailblazers in sustainable energy and ESG practices, inspiring others to follow suit.

Over the next two days, we'll engage in thought-provoking discussions, share best practices, and explore innovative solutions. We'll delve into the complexities of energy transition, from policy and regulation to technology and finance.

But we won't just talk – we'll take action. We'll launch initiatives, forge partnerships, and make commitments that will propel our continent towards a sustainable energy future.

I urge you all to embrace this moment. Let us work together to create an Africa that is powered by clean energy, driven by innovation, and guided by a shared vision of sustainability.

Thank you, and let's begin this journey together!

Our Partners

Deloitte.

The Financial Sustainability of Africa's Energy Transition-The Role of ESG in Attracting Investment:

**10th August 2024
Volta Hotel, Akosombo**

The Think Energy Awards are the biggest platform in Africa where sustainability is rightfully recognized. Last year was an exceptionally successful year for the sustainability industry.

Notable figures like former Ghanaian president John Agyekum Kufuor, Africa's richest person Aliko Dangote, Dr. Ben Asante (CEO of Ghana Gas and Ecobank Ghana Ltd.), and global giant

TotalEnergies Marketing Ghana Ltd. were all honored alongside other great personalities.

Deloitte, one of the world's "Big Four" professional services networks, is a leader in sustainability consulting and advisory services.

This year, they are the official partner firm for the Think Energy SDG Awards, making it the world's biggest sustainability awards program focused on Africa. We are deeply grateful to Deloitte for elevating the prestige of the awards globally and showcasing Ghana's journey on energy transition on the highest international stage.

Deloitte will manage all pre- and post-award activities to ensure the highest standards and credibility in sustainability practices.

This flagship event will undoubtedly shape and improve sustainability practices in Africa and promote greater advocacy to avoid green-washing.

Green Economy manifesto Forum and panel discussion

The Political Parties' Manifesto on Green Economy launch will have a positive impact on the following SDGs:

SDG 4: Quality Education

- The manifesto will promote education and awareness on green economy principles, sustainable development, and environmental conservation, aligning with SDG 4's target of ensuring inclusive and equitable quality education.

SDG 7: Affordable and Clean Energy

- By committing to green economy principles, political parties will prioritize the transition to renewable energy sources, reducing dependence on fossil fuels and promoting clean energy access, in line with SDG 7's targets.

SDG 13: Climate Action

- The manifesto will encourage political parties to develop and implement climate change mitigation and adaptation strategies,

- aligning with SDG 13's targets to combat climate change and its impacts.

SDG 14: Life Below Water

- The green economy principles promoted in the manifesto will emphasize sustainable management of marine resources, reduction of pollution, and conservation of marine ecosystems, supporting SDG 14's targets to conserve and sustainably use the oceans.

The manifesto launch will impact these SDGs by:

1. Raising awareness and promoting education on sustainable development and green economy principles.
2. Encouraging policy commitments to renewable energy, climate change mitigation, and sustainable resource management.
3. Fostering a culture of sustainability and environmental stewardship among political parties and stakeholders.
4. Supporting the achievement of SDG targets through policy implementation and stakeholder engagement.

By launching this manifesto, Think Energy Media, Graphic Communication Group, and Deloitte are contributing to a sustainable future for Africa, aligning with the SDGs and supporting the continent's development aspirations.

ESG Summit topics and participating companies

Day 1

Introduction to Sustainability and ESG

- Sustainability & ESG;
- The relevance of ESG & sustainability for business

Climate change - Risks, Opportunities and Reporting

- Introduction to climate change risks and opportunities;
 - Integrating climate risks and opportunities into finance;
 - Climate reporting - narrative disclosures for climate;
 - Climate reporting – aligning narrative disclosures with financial statements.
-

Day 2

- Sustainability & ESG Assessments – Process & Principles
- Introduction to ESG & sustainability assessments;
- ESG & sustainability materiality assessments; and
- Measuring ESG & sustainability performance.
- Disclosing and Reporting ESG & sustainability performance (Focus on International Sustainability Standards Board – IFRS S1 and S2).
- Sustainability Strategy & Sustainability Reporting
- GreenHouseGas Emissions (Carbon capture, Carbon trading GHG Protocol, Net Zero)

Unveiling the Future of Sustainable Development: Africa's First-Ever Political Parties' Manifesto on Green Economy

In a groundbreaking initiative, Think Energy Media, in collaboration with Graphic Communication Group and powered by Deloitte, is proud to present the inaugural Political Parties' Manifesto on Green Economy at the 5th Africa Energy and Sustainability Summit. This pioneering event marks a significant milestone in Africa's journey towards a sustainable future, aligning with the United Nations' Sustainable Development Goals (SDGs) and the African Union's Agenda 2063.

Why is this event crucial?

As the world inches closer to the 2030 deadline for achieving the SDGs, African nations face a critical juncture. The continent's rapid growth, urbanization, and industrialization pose significant environmental challenges, necessitating a paradigm shift towards sustainable development. Political parties, as key stakeholders, must integrate green economy principles into their manifestos to ensure a cohesive and sustainable approach to development.

Objectives:

1. Foster a shared vision: Encourage political parties to adopt a unified green economy framework, ensuring consistency in policy implementation.
2. Inform and educate: Provide a platform for knowledge sharing, capacity building, and awareness raising on green economy principles and best practices.
3. Inspire action: Encourage political parties to commit to tangible green economy initiatives, driving progress towards SDGs and Agenda 2063.

Relevance leading up to 2030:

1. SDG alignment: This event directly supports SDGs 12 (Responsible Consumption and Production), 13 (Climate Action), and 17 (Partnerships for the Goals).
2. Climate change mitigation: By promoting green economy principles, political parties can develop strategies to reduce carbon emissions and transition to renewable energy sources.
3. Sustainable development: This initiative ensures that economic growth is balanced with environmental stewardship and social responsibility, guaranteeing a prosperous future for African nations.

Join us at the 5th Africa Energy and Sustainability Summit as we embark on this historic journey, shaping the future of sustainable development in Africa. Together, let's unlock a greener, more resilient continent for generations to come.
